

About Me

I am a strategic thinker and motivated individual with problem solving and teamwork as my core competencies with a great attention to detail and creating products with good user experience leading to product growth. After years of listening to people complain about the softwares they were forced to use at work, I decided to transition into UX design. My mission is to discover new ways of human/technology collaboration, making sure every voice is heard.

My Experience

JUNE 2022 - present

UX Designer

SpaceYaTech

Participated with a team of 45 designers in building a web design for a Tech space start-up here in Kenya.
